Art Unit: 1648

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 11, 13- 15, and 16- 25 drawn to a chimeric phage with nonfunctional coat protein plus functional fusion coat protein and method of making, classified in class 435, subclass 320.1.
- II. Claims 12, 13- 15, drawn to a mutant phage with altered host range, classified in class 435, subclass 235.1.
- III. Claims 26-30, drawn to a helper phage encoding assembly proteins and nonfunctional coat protein, classified in class 435, subclass 457.
- IV. Claims 31- 42, drawn to a method for making helper virus, classified in class 435, subclass 69.1.
- V. Claims 43- 44, drawn to a method to enrich of a binding pair, classified in class 436, subclass 501.
- VI. Claim 45, drawn to a nucleic acid molecule, classified in class 536, subclass 23.72.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

Application/Control Number: 09/882,621

Art Unit: 1648

the instant case the different inventions are drawn to three different phages being: one chimeric requiring functional fusion and nonfunctional coat proteins, one requiring altered host range and the third a packaging phage requiring assembly proteins and nonfunctional coat protein.

Inventions IV, V and I- III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case both methods could be used to make different products. Method IV could be used to make the chimeric phage and method V could be used to present a different protein, a receptor for example.

Inventions VI and I- V are related as product and process of using. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the nucleic acid could be used to make either the chimeric phage or the altered host range mutant.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and have different search requirements, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/882,621

Art Unit: 1648

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Myron G. Hill whose telephone number is 703-308-4521. The examiner can normally be reached on 9am-6pm Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Housel can be reached on 703-308-4247. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-4242 for regular communications and 703-308-4242 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0196.
